

Flugmeldemess Stellungen in Norway.

1 MAY 1945

BAMA RL 9/43.

Corrected 2009-03-14

One should think that an official German *Gliederung*, would be precise, correct and consistent, so all the answers to a question on *Der Ln-Dienst* in Norway would be answered by this document. Well think again. It is the same pattern as I have found with the similar documents in Denmark. There is a large number of *Stellungen* where unit, name, location and equipment can be found. And there is a group where the name, location and equipment can be found, but no unit can be associated immediately so several sources have to be consulted. The identification of the Freyas in the chart below is based on their serial numbers.
